

MID - Warning Check oil-level appears

Models:

Astra-F 92-98,5, Vectra-B 96-98, Astra-G 98,5-99

Engines:

1.8 l, 2.0 l

Option:

X18XE,X20XEV

Group:

J - Engine

Troublecode:

Non

Complaint:

Wrong Indication

Warning "Check oil-Level" appears too early although the oil-level is correct.

Cause:

Sensor "Oil-Level" responds too early.

Production Solution:

Special part:

No

Remedy:

In case of complaint flash improved software on MID. Improved software is available on TIS-CD-ROM 52.

More information for MID programming-refer to the appropriate checking procedure.

If the warning appears again after the programming, a mechanical defect must be assumed. In this case you have to check engine wiring harness, plugs and oil-level sensor.
